

## SPECIFICATION

### WOOD TYPE:

Plywood panels

### BOTANICAL GENUS:

Betula

### DURABILITY:

High

### DENSITY:

Approx. 680

### MOISTURE MOVEMENT:

Medium

### TIMBER PROPERTIES:

Strong, stiff, resistant to moisture, and easy to work

### TEXTURE:

Varies

### AVAILABLE SIZES:

Thickness: 6mm /8mm/2mm/18mm/21mm/24mm

Width: 1220mm

Length: 2440mm

## BIRCH PLYWOOD

Birch trees are an incredibly renewable resource: almost every part of the tree is utilised for something, from furniture and flooring to canoes.

Birch is fast growing, and supports a wide variety of wildlife. For these reasons, birch is a great choice for the environment, as well as your customers.

Birch ply is a high-quality plywood that came into fashion in the 19th century. It has a wide variety of applications, including construction, furniture, toys, vehicle building, packaging and more.

One of the reasons it is so widely used is that it combines durability with being easy to work – and does so at a very reasonable price.

Quercus always endeavour to purchase the highest quality Birch Plywood and it is always FSC Certified.
