

## SPECIFICATION

**WOOD TYPE:**

Hardwood

**BOTANICAL GENUS:**

Quercus

**DURABILITY:**

Moderately durable

**DENSITY:**

770

**MOISTURE MOVEMENT:**

Medium

**TIMBER PROPERTIES:**

Strong, durable, with medium moisture movement and relatively easy to work

**TEXTURE:**

Medium

**AVAILABLE SIZES:**

Thickness: 25.4mm-76.2mm  
Width: 120mm and wider

## American White Oak

American White Oak grows from southern Quebec and Ontario to eastern Minnesota and Iowa, extending eastward to the Atlantic and southward through the lower western slopes of the Allegheny and Appalachian Mountains. American White Oak is broadly comparable to European Oak but slightly stronger and more variable in colour, ranging from pale yellow-brown to pale reddish-brown. Its grain is generally straight, and its texture varies from coarse to medium coarse.

American White Oak has a range of uses, from Doors, Floors, Stairs and Kitchen and cabinetry work. It is available in a number of grades and specifications, predominantly random width, but fixed widths are also available.
